

## Enchanters Nightshade - *Circaea luetiana*

### Description

Enchanters nightshade grows up to 60cm tall with an erect, square stem. The plant has oppositely arranged rounded triangular and slightly serrated leaves, and is topped by the flowering structure which holds a spike of small white flowers.

Enchanters nightshade grows in the moist, basic and nutrient rich soils of W8-9 and W12-13 communities, usually in ancient semi natural woodlands. The species is rarely seen outside of a woodland habitat.

### Soil regimes

<b>Soil reaction (R)</b>	7
<b>Nitrogen availability (N)</b>	6
