

Let's Play!

Game: 'The Fox and the Bunnies'

Aim of the Game:

The Fox's Aim is to catch a Bunny.

The Bunny's Aim is to get to the next Bunny without getting caught by the Fox.

1. Bunnies hide behind chosen trees (1 Bunny per Tree).
2. 1 Bunny stays at the start with the Fox.
3. That Bunny will get a few seconds headstart to begin getting to the nearest Bunny.
4. Once the first bunny reaches the 2nd Bunny, the Fox cannot catch them, as the Fox can only catch Bunnies between trees.
5. If the Fox fails to catch the 1st Bunny before they reach the tree, the Fox will then aim to catch the 2nd Bunny and so on.

Note: If there are only 2 people playing, the Bunny's aim is to get to the next tree without being caught by Fox.
